

Utah County Employee of the Month, May 2011
Jeff Wilkinson - Computer Technician
Information Systems

I am pleased to nominate Jeff Wilkinson for Employee of the Month. I have worked with Jeff for about two years; during that time, I have been continually impressed by his skills, work habits, and positive attitude. Jeff is an asset to both the computer department and the County in general.

As a computer tech, Jeff willingly takes on new challenges and sticks with each task until it is successfully completed. For example, he was recently asked to set up a Windows server system for the dispatch center. He jumped into the project, dug out whatever information was necessary, and made the whole operation, including the conversion to their E-mail system, a strong success. Jeff's work was acknowledged by a letter of appreciation sent to his department head. That letter refers to his willingness to go above and beyond what was expected, responding to every issue until the work was successfully completed. Jeff has also helped define our Altiris system, making it a valuable tool in increasing department efficiency as well as end user satisfaction. Jeff's work has significantly cut down the length of time needed to install new machines, a benefit to everyone.

Our department works closely and effectively as a cohesive team. Jeff plays an important role in that team, as he looks for ways to make things work more efficiently for our department as well as for colleagues. His work ethic is an example to be emulated by all of us. Another of Jeff's strengths is his sense of humor, which enables him to handle the demands of the job as well as to find ways to work cooperatively with users who may be frustrated.

Jeff and his wife, Aleah, live in Payson with their two children, daughter Nikita and son Brody. He enjoys fishing, hunting, camping, and horseback riding. He is a lifetime resident of Utah County.

We enjoy working with Jeff and appreciate the quality of his work, his enthusiasm, and the contributions he makes to Utah County.

Nominated by Larry Howard, Senior Computer Technician
