During the past several months, Mike Perry and his team in Information Systems have developed from scratch, a mobile friendly web application for marriage licenses that will significantly increase the efficiency of our office and make applying for marriage licenses an easy process for many couples. This revolutionary system was made entirely possible only through the efforts of Mike and his colleagues in IT. Mike is an incredible resource for our county and has helped our office solve a significant challenge.

Those that work with him are grateful to have all the new innovations Mike has brought to our programming team. Mike is essential to the IS staff. Who would of thought we would using Facial Recognition, not a problem for Mike and his team? He has greatly exceeded our expectation with his brilliant programming abilities and solutions. He is fearless at trying new approaches and new avenues to find better solutions.

Not a day goes by where Mike is not helping another team member or doing Pair Programming with a team member.   Mike is always there to accept the challenge of solving complicated programming.   Not only solving the problems but being very detailed and analytic in achieving the programming solution. He does all this and still maintains a very positive, always helpful, considerate team player and humble.

Mike is more than qualified to receive this recognition. Utah County is a grateful benefactor of Mike's unique qualities and upstanding character

Amelia Powers Gardner, Josh Daniels, Justin Anderson, Patrick Wawro, and Jerry Chapman.
